

Amanda L. Ryman

AMANDARYMAN@GMAIL.COM — AMANDARYMAN.COM — (316) 204-1773 — SHE/HER

Qualifications

- ▶ Over 6 years of full-stack development experience; designs and maintains multi-tiered enterprise software using domain-driven design principals
- ▶ Collaborates effectively in mission-critical cross-team efforts; works with product owners and directly with clients to tease out requirements and ensure product correctness
- ▶ Quickly triages and investigates production issues; seeks out ways to improve stability, scalability and performance of legacy applications while future-proofing new systems
- ▶ Ardent code review participant and contributor to the continuous improvement and upkeep of in-house best practices, technology selection, and both business-facing and technical documentation

Skills

- ▶ Development of REST APIs and WCF services across the .NET platform using C#
- ▶ Managing relational databases (SQL/SSMS) including schema design, stored procedures and views
- ▶ Building responsive Single-Page Applications using Vue and Typescript
- ▶ Configure application build and deployment with modern tools like Babel, NPM, Webpack and Docker
- ▶ Version history management using git and git-based platforms
- ▶ Bash and powershell scripting

Experience

- ▶ **Full Stack Developer - ConsumerCellular/Altsource** {Dec 2018 - July 2022}
 - * Developed .NET applications to support billing, collections and fraud prevention for a telecommunications provider serving approximately 4 million subscribers
 - * Maintained a code base of more than 60 applications with a mix of modern and legacy frameworks
 - * Altered critical systems in order to track bankruptcy claims and maintain regulatory compliance using third-party vendor integrations
 - * Collaborated with team members, architecture, and directly with stakeholders to design solutions for business needs and track KPIs
 - * As a member of the Employee Engagement Committee, worked to encourage professional growth, increase managerial transparency and build the relationship between the company and employees
- ▶ **Software Developer - Performance Logic** {Mar 2016 - Dec 2018}
 - * Built and maintained browser-based project management software for the medical industry using C++ and an in-house scripting language
 - * Owned and developed the user interface, server-side code and maintenance scripts for various company product lines
 - * Managed data backups and wrote scripts and tooling to support custom workflows
- ▶ **BA in Liberal Studies, Minor in Computer Science - Portland State University** {Dec 2015}
 - * Completed with four terms on the Deans List and a 3.8 GPA
